RENTAL and CUSTOM CHARGES for FARM MACHINERY

REVISED 1990

Rental and Custom Charges

This guide and work sheet has been developed to help farmers and custom operators calculate rental and custom charges for various farm operations.

The figures given here are for average conditions and may have to be altered for abnormal conditions such as stony land, excessive travel distances, etc.

THE CHARGES INCLUDE DEPRECIATION, INTEREST ON INVESTMENT (INTEREST AT 12% PER ANNUM), MAINTENANCE, REPAIRS AND A MARK-UP OF 20 PERCENT.

The rates are based on the retail list prices of the machines. If a new machine is purchased for less than the full retail price, a corresponding reduction should be made in the rental charges.

The charges listed are based on the machines' effective width unless otherwise indicated. Fuel is not included in the charges except for SP combines.

TO USE THE GUIDE AND WORK SHEET PROCEED AS FOLLOWS:

1. Enter the size of machine in Column 3.

2. Calculate the hourly rental charge for the machine by multiplying the rental rate by the size of the machine (Col. 2 x Col. 3) and enter in Column 4.

   This is the hourly rental charge for the machine.

3. Calculate the tractor power required for the machine (Col. 3 x Col. 5) and enter in Column 6.

4. Calculate the tractor charge by multiplying the figure in Column 6 by the tractor rate and enter in Column 7. Tractor rental rates given on page 3.

5. Add the machine charge to the tractor charge (Col. 4 & Col. 7) and enter in Column 8.

   This is the total hourly rental charge for the tractor and machine.

6. If a custom rate is desired, enter the labour charge in Column 9 and add it to Column 8 to get the custom rate. Enter in Column 10.

7. Custom charges for self propelled combines are given on page 4.

8. If a custom or rental rate per hectare is desired for any of the machines, the hectares per hour must be calculated.

   hectares per hour (ha/h) =

   $$\frac{\text{width in metres} \times \text{speed in km/h}}{10}$$

   For tillage operations the above rate should be multiplied by about 80%, and for seeding and harvesting by about 65% to get actual field work rates.

NOTE: The rates shown are based on the assumed hours of use per year that are indicated. If the hours of use per year are 25 percent less than those indicated, the rates should be increased by 20 percent; if the hours of use per year are 25 percent greater, the rates should be reduced by five percent.

Tractor Rental Rates

Hourly Rental Rates (not including fuel)

Hours of use per year	2 wheel drive	2 wheel drive with front wheel assist	4 wheel drive
300	$0.39/kW (0.29/HP)	$0.425/kW (0.315/HP)	$0.41/kW (0.305/HP)
500	0.265/kW (0.20/HP)	0.29/kW (0.215/HP)	0.28/kW (0.21/HP)
800	0.215/kW (0.16/HP)	0.235/kW (0.175/HP)	0.23/kW (0.17/HP)

Additional Charges

Direct cut headers		Cornheads	
6 m	$ 4.00	4 row	$17.50/h
7.5 m	6.50	6 row	30.00/h
9 m	10.00	8 row	43.00/h

For combines not listed above the rates are as follows:

Pull type $9.50/m²* (not including tractor, operator or fuel)
Self Propelled $15.00/m²* (not including operator or fuel)

*Total combine separating area in square metres - see page 5.

Example: White 8900 combine with pickup
8.2 m² separating area
8.2 x 15.00 = $123/h plus operator and fuel

For rotary combines not listed above the rate is $1.25 per $1000 of new cost plus operator and fuel.
